

Ismail Hossain

Full-Stack Developer & Designer · Dhaka, Bangladesh

ismailhsan45@gmail.com | ismailh.dev | [GitHub](#) | [LinkedIn](#)

I build web and mobile products, thoughtful interfaces, and practical AI integrations. My experience spans shipped consumer apps, an AI agent platform, and computer vision—work relevant to Ontik’s venture-building approach.

SELECTED PROJECTS

PostMind — AI writing app

[App Store ↗](#)

React Native app for generating personalized X posts, threads, and replies, with subscriptions through Stripe and RevenueCat.

Sonkhipto News — AI-powered news app

[App Store ↗](#)

Cross-platform app and Next.js backend that scrape news with Cheerio, summarize stories with AI, and deliver push notifications. Built with React Native and PostgreSQL.

SiteAssist — AI message agent platform

[Website ↗](#)

Contributed to a platform for selling and managing customer-facing AI message agents.

Tree Life Detection — computer vision

[GitHub ↗](#)

ROS 2 perception pipeline for MIST Mongol Barota: streams camera frames to a YOLO detection node via CvBridge and OpenCV for real-time annotated video.

Faculty Evaluation Helper — Chrome extension

[GitHub ↗](#)

Helps MIST students fill portal evaluations, with review-before-submit, editable comments, and progress tracking.

EXPERIENCE

Full-Stack Developer · Byteform LLC

Jan 2025 – Jul 2025
